

Jonathan Reading

Front-end web developer

Tel: (07599) 850002 | Email: jon.reading.email@gmail.com

- I am passionate about bringing designs to life and providing users with engaging interactive experiences
- 8 years experience working on award winning projects for high profile clients such as BBC, Channel 4, Channel 5, Film London.
- Specialising in front-end web solutions ranging from brochure sites to sophisticated web applications
- Expertise in latest web technologies including HTML5, CSS3, LESS, SASS and OO Javascript, Grunt
- Utilising methodologies such as 'Mobile first', 'Responsive development', 'Progressive enhancement' and 'Feature detection'
- Experience transitioning from legacy code base to responsive code base.
- Expertise in sharing a single codebase between client and server
- Streamlined workflow incorporating version control, unit testing (TDD), BDD, auto-generated documentation and automated builds.
- Producing modular reusable code, utilising design patterns
- Adhering to W3C and Accessibility standards
- Experience in rapid prototyping within an agile development environment
- Proven track record in meeting tight deadlines within high pressure environments
- Broad skill-set with experience using Nodejs, Javascript, PHP, Objective C, MySQL

Employment

Lead Frontend Developer
2013 – 2015
BBC Worldwide

<http://www.bbc.com/capital>
<http://www.bbc.com/culture>
<http://www.bbc.com/earth/world>
<http://www.bbc.com/future>
<http://www.bbc.com/travel>

My task at the BBC was to transition the BBC wwFeatures codebase build on PHP Forge to a new responsive framework. This framework supports BBC Capital, BBC Culture, BBC Earth, BBC Future, BBC Travel.

The application is developed using Nodejs / Javascript featuring a cutting edge client / server architecture. Developed using a mobile first approach and features a fully responsive design. Built with grunt and deployed on AWS in a continuous delivery cycle.

My role was to architect and implement the application while maintaining the old system during the transition. I worked closely with design teams to prototype ideas as well as test the feasibility of designs. I liaised with the back end team to develop JSON end points and numerous other team with the BBC. The project was managed using Scrum methodology.

Lead Developer
2006 – 2012
KentLyons
<http://www.kentlyons.com>

I joined KentLyons straight from university as a creative developer. I soon developed a bespoke CMS which was used on all major project for clients such as the BBC, Channel 5, Film London as well as a transaction e-commerce module which has been used for over £ 2 million of transactions. Within 3 years I was leading the development team and incorporated sophisticated workflow such as continuous integration. I was constantly involved in R&D of web technologies and brought expertise and knowledge that were fundamental in winning multiple projects. I am strong team player and I always endeavoured to ensure an optimum UX by engaging with designers to ensure successful workable designs. I prepared technical approach documentation, planned application architectures and liaised with external technical teams from companies such as the BBC and Channel 4.

Education

BSC (Hons) Multimedia Technology
First Class
2003-2005
Nottingham Trent University
